Elizabeth North Primary School
Sunsmart Policy
Sun Smart

Rationale

Australia has the highest incidence of skin cancer in the world with skin cancer accounting for around 80% of all new cancers diagnosed each year.

The major cause of skin cancer is exposure to the ultraviolet rays (UVR) of the sun over many years. Up to 70% of Australian’s have detectable sun damage of the skin by the age of 14 years.

Research highlights skin protection, particularly in the first 18 years of life, as a major strategy in the fight against cancer.

The effect of UVR accumulates over the years, affecting the deeper layers of the skin. Skin cancer depends on total exposure, and the greater the exposure the higher the rate of skin cancer. As a result it is never too late start taking precautions.

Source: The Cancer Council South Australia.

Aims

The aims of Elizabeth North Primary School Sun Smart Policy are to promote among students, staff and parents / carers:

- Positive attitudes towards skin protection
- Lifestyle practices which can help reduce the incidence of skin cancer and number of related deaths
- Personal responsibilities for and decision-making about skin protection
- Awareness of the need for environment changes in schools to reduce the level of exposure to the sun.

This policy is for implementation throughout the year. The purpose of this policy is to ensure that all children attending our school are protected from skin damage caused by harmful ultraviolet rays of the sun.

As a Part of General Skin Protection Strategies

All students will wear a school approved broad brimmed, or bucket hat as recommended by The Cancer Council South Australia whenever they are outside e.g. recess and lunch, sports, sports carnivals, outdoor excursions and other activities from beginning of September to end of April. Hats are not required from beginning May to end of August when engaged in class activities outdoors to enable exposure to vitamin D.

Students are advised to wear appropriate clothing e.g. NO singlets or dresses without sleeves and to bring adequate fluids they can consume throughout the day.

Students who do not have a school approved broad brimmed or bucket hat will sit out in a supervised area.

Students will be encouraged to use available areas of shade for outdoor play activities.

Outdoor activities will be held in areas of shade whenever possible.

Students will remain inside at recess and lunch on days when the forecast is 35 degrees or over.
Staff will act as role models by practising Sun Smart behaviour:

- Wearing protective hats and appropriate clothing for all outdoor activities especially when on yard duty.
- Using SPF 30+ rated sunscreen, applying 15-20 minutes before going outside and if outdoors will re-apply around SPF 30+ rated sunscreen every two hours or sooner when involved in water activities, broad spectrum, water resistant for skin protection.
- Seeking shade whenever possible.

Our School Will

Ensure that hats are appropriate and satisfy The Cancer Council South Australia guidelines.

Ensure that adequate shade is provided at sporting carnivals and outdoor events.

Reschedule outdoor activities/events to be held outside peak radiation times whenever possible.

Provide SPF 30+ rated, broad spectrum, water resistant sunscreen for staff and student use whenever possible.

Incorporate programmes on skin cancer prevention in the curriculum.

Reinforce regularly the Sun Smart policy in a positive way through newsletter, parent meetings, student and teacher activities.

When Enrolling a Student, Parents/ Caregivers will be:

- Informed of the Sun Smart Policy.
- Requested to purchase hat or provide a school approved broad brimmed or bucket hat for their child’s use.
- Encouraged to apply sunscreen to their child prior to school each day.
- Encouraged to practise skin-protective behaviour themselves.
- Asked to sign the statement on the Student Information Form supporting the Sun Smart Policy.
